714-QGS-CH Gaslight Reproduction Victorian 4 Arm Chandelier Circa 1890 in Polished Brass

714-QGS-DK Victorian 4 Arm Chandelier in Antique Brass Finish

714-QGS-OB Victorian 4 Arm Chandelier in Oil Rubbed Bronze Finish

Reproduction of John W Call of Phil., PA Circa 1890. Nice four arm gas chandelier of solid brass. Comes with an unlacquered surface so it will age to a lovely patina over time, or for an aged appearance choose one of our antique patinas. Note that we have left the original design of gas keys on each arm, which were used to turn on the gas.

Fixture uses 4" fitter shades. Shades sold separately. We picture [our etched floral design glass shade](#) as a suggestion. We have a good number of [4" shades](#) that would look terrific with this fixture.

We have other gaslight products to enhance this fixture. A lovely [single wall sconce](#) works well near the fireplace or in hallways. For a double wall sconce, check out [702-DGS-ES](#). Almost every home with a staircase had a [gas newel post](#) at each turn of the stairs. And for a pendant light for smaller areas, consider [712-DGS-EP](#). All stems can be shortened to your desired length, or we offer [extension kits](#) if you need a longer drop.

You can save on freight by combining your light fixtures with the ceiling medallion and other hardware into one shipment.
